

HUMANOID ROBOTICS SEED FUND: TERM SHEET

Executive Investment Agent Memorandum & LP Capital Commitment Summary | 2026 Target Vintage

Investment Thesis Summary: Capturing manufacturing alpha across the 3–5 year global ramp from pilot lines to mass production (1,000,000 units/year). Capital targets Tier-1 actuator bottlenecks (Tuopu, Sanhua, Inovance, HL Mando/Moog, Harmonic Drive) achieving a **30%–50%+ ROI** at an **>80% probability threshold** backstopped by core automotive revenue baselines.

1. KEY OFFERING & STRUCTURAL TERMS

Parameter / Term	Fund Specification	Investor Security & Mechanism
Fund Name / Focus	Humanoid Robotics Actuator Seed Fund I	Cross-Platform Tier-1 Mechanical Bottleneck Strategy
Target Fund Size	\$25,000,000 USD	Dedicated hardware deployment across 5 core basket assets
Target Return (ROI)	30.0% – 50.0%+ Cumulative ROI	3–5 Year Horizon (Weighted Portfolio 36.5% Revenue CAGR)
Probability Threshold	>80% Conviction / Success	Anchored in established automotive Tier-1 balance sheets
Management Fee / Carry	2.0% Annual / 20.0% Performance	100% hurdle rate backstop prior to carry distribution
Min LP Commitment	\$250,000 USD (Individual / Institutional)	Direct custody allocation via Stock Connect & global brokerages

2. TARGET ASSET ALLOCATION & VALUATION MULTIPLES

Company Name	Ticker / Exchange	Supply Chain Focus	Allocation	Fwd P/E	3-Yr CAGR
Ningbo Tuopu Group	601689.SS (Stock Connect)	Rotary Actuators & Hand Drive Systems	30.0%	16.5x	45.0%
Zhejiang Sanhua Controls	002050.SZ (Stock Connect)	Linear Actuators & Thermal Management	25.0%	22.0x	38.0%
Inovance Technology	300124.SZ (Stock Connect)	Industrial Servo Drives & Automation	20.0%	28.0x	30.0%
HL Mando / Moog Inc.	204320.KS / MOG.A (NYSE)	Boston Dynamics Actuators & US Defense	15.0%	18.0x	25.0%
Harmonic Drive Systems	6324.T (Tokyo TSE)	Precision Strain-Wave Gear Reducers	10.0%	35.0x	35.0%
WEIGHTED BASKET	Cross-Border Portfolio	Diversified Multi-OEM Hardware Backbone	100.0%	24.3x	36.5%

3. INFUSION TIMELINE & CAPITAL CALL SCHEDULE

- **Capital Call Date (Year 0 / Pilot Phase):** 100% upfront capital infusion upon closing. Secures Tier-1 factory allocations during the Tesla Optimus V3 50% yield pilot phase.
- **Harvest Trigger (Year 3):** 30%–40% position trimming as annual industry production scales toward 1,000,000 units/year (~2,740 units/day).
- **Full Exit Execution (Years 4–5):** Complete capital distribution prior to automotive-style Tier-1 margin compression (ASP adjustment from \$15,000 down to \$4,500/set).

4. LP SOFT-CIRCLE COMMITMENT & SIGNATURE BLOCK
